INVESTMENT DESCRIPTION

The Old Mutual Balanced Index Fund is a fully diversified fund investing in a mix of local and offshore equities, listed property, interest bearing assets (including inflation linked bonds) and cash.

It invests in funds targeting the return of an index. Index funds offer the benefits of substantially lower fees and significantly reduce the uncertainty of fund performance relative to the market. Lower fees and efficient investment indexation processes minimise the tracking error on the overall returns.

Through a well-diversified mix of asset classes, this fund aims to deliver long-term growth while limiting the volatility in returns. The fund is Regulation 28 compliant and rebalanced, in line with its strategic allocation, in March every year. Rebalancing the fund annually keeps trading costs to a minimum while ensuring that it partakes in the intended combination of returns originating from each asset class. The fund has a long-term real return target of 5% (CPI+5%).

This is a moderate risk fund exposed to share price, interest-rate and currency fluctuations. A balanced, diversified fund across local and global asset classes helps lessen these fluctuations.

This fund is suitable for investors wanting moderate to high long-term growth with less volatility than pure equity.
