Class A	OLMFA	ZAE000223285
Class B1	OLMB1	ZAE000223293

FUND OBJECTIVE

The fund aims to achieve long-term inflation-beating growth from a cost-efficient balanced portfolio with an equity exposure typically displayed by multi-asset low equity portfolios conforming to the regulations governing retirement fund investments.

WHO IS THIS FUND FOR?

This fund is suited to investors wanting inflation-beating long-term growth in a cost-efficient multi-asset low equity fund with less volatility in the short term compared to a multi-asset medium equity fund. The fund is suitable as a stand-alone retirement investment.

INVESTMENT MANDATE

The fund is exposed to all sectors of the market (shares, bonds, property and cash) with a maximum of 40% exposure to equities and may gain exposure to foreign assets up to a maximum of 45% of its portfolio. The fund will have a minimum exposure of 50% to passively managed underlying securities. Derivatives may be used for efficient portfolio management purposes.

REGULATION 28 COMPLIANCE

The fund complies with retirement fund legislation. It is therefore suitable as a stand-alone fund in retirement products where Regulation 28 compliance is specifically required.

- 16 years of investment experience

The second quarter of 2026 was once again an eventful period with geopolitics and technology playing major roles in the market. Market sentiment seemed to be more optimistic over the quarter, even with the remaining uncertainty in the Middle East. While there are signs of de-escalation in the region, developments remain unpredictable and the future trajectory is far from clear. The tech sector showed strong performance once again this quarter, with AI being the primary driver.

The US economy demonstrated good resilience despite ongoing geopolitical and inflationary pressures over the last three months. Over the last quarter, the US-Iran conflict mainly affected the US economy through increasing oil and petrol prices, which contributed to higher inflation and greater market uncertainty. While financial markets experienced some volatility the overall US economy remained resilient, with continued economic growth and a strong labour market.

The European market showed resilient, but modest growth over the last quarter, while experiencing increased energy costs and geopolitical uncertainty due to the ongoing conflict in the Middle East. European equities seemed to rally over the last three months due to the apparent de-escalation in the Middle East and cooling inflation in the region.

Over the last quarter, Asian economies continued to perform well, supported by strong domestic demand, resilient consumer spending, and ongoing growth in the technology and semiconductor sectors. However, economic activity was moderated by rising energy costs, geopolitical tensions in the Middle East, and uncertainty surrounding global trade conditions. China's tempered growth and resilience remained a strong factor for the region's overall performance. However, performance differed across countries and industries, as varying economic conditions and levels of exposure to global trade and technological developments influenced market returns.

The South African markets produced varied results during the second quarter of 2026. While equity markets came under pressure due to weaker commodity prices, bonds and listed property had a strong performance when compared to the last quarter. The FTSE/JSE All Share Index decreased by -2.4% over the quarter. The FTSE/JSE SA Listed Property Index increased by 10.3%, while the FTSE/JSE All Bond Index increased by 7.9%.

The fund has delivered a return of 8.9% per annum since its inception in April 2017.

The FTSE/JSE Capped All Share Index returned -2.4% for the quarter ending June 2026, while the FTSE/JSE All Property Index gained 10.5%.

The MSCI All Country World Index (MSCI ACWI) ended the quarter of June 2026 with a return of 14.9% in US dollar terms and 10.8% in rand. The MSCI World Index returned 13.8% for the quarter, while the MSCI Emerging Markets Index returned 24.1%. The rand appreciated against the US dollar by 3.3% over the quarter.

The FTSE/JSE All Bond Index (ALBI) and FTSE/JSE Inflation-Linked Government Index (IGOV) returned 7.9% and 6.6% respectively for the quarter ending June 2026.

The broad market South African equity exposure in the fund is primarily through an allocation to the FTSE/JSE Capped All Share Index, which is intended to be a fairer reflection of the investment universe available to a South African investor. In addition to the broad local equity market exposure, the fund also has exposure to South African listed property, through the FSTE/JSE All Property Index.

The international equity exposure is invested in the MSCI ACWI, which offers exposure to both developed and emerging markets globally. To diversify the fund away from equity, it has exposure to nominal and inflation-linked bonds through exposure to the ALBI and IGOV and exposure to gold.

OTHER INVESTMENT CONSIDERATIONS

ONGOING

	Class A	Class B1
Annual service fees (excl. VAT)	0.50%	0.25%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

The fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, include audit, custodian and trustee charges and service fees of collective investment schemes in which the fund holds interests. These are included in the TER.

	36 Months		12 Months	
Total Expenses (Incl. Annual Service Fee) (30/06/2026)	**Class A**	**Class B1**	**Class A**	**Class B1**
Total Expense Ratio (TER) Incl. VAT	0.70%	0.41%	0.68%	0.40%
Transaction Cost (TC)	0.06%	0.06%	0.06%	0.06%
Total Investment Charge	0.76%	0.47%	0.74%	0.46%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

OLD MUTUAL CORE CONSERVATIVE FUND

MINIMUM INVESTMENTS

LOW BALANCE CHARGE
Effective from 31 March 2025, a Prescribed Minimum Balance of R10 000 per fund per investment contract will apply. Failure to maintain the Prescribed Minimum Balance in any such fund will result in a Low Balance Charge* of R31 per month excluding VAT being incurred. However, if there is an existing monthly debit order of a minimum of R500 into each underlying fund within your investment contract, the Low Balance Charge will not apply. Please refer to the link for a full disclosure on how the Low Balance Charge will apply to your investments.
* This charge will not apply if investing via investment platforms such as Old Mutual Wealth.

INITIAL CHARGES (Excl. VAT):
Initial adviser fee will be between 0% and 3.00%.

DISCLOSURES

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- Investments in unit trusts should ideally be a medium- to long-term strategy that takes cognisance of the Recommended Investment Term of each individual fund as stipulated in its Minimum Disclosure Document. A fund's or an investment strategy's ability to provide benchmark performance, or to achieve its performance target over its Recommended Investment Term on a net of fee basis may be impacted by market illiquidity, differences in fund and market pricing points, concentration risk and other local (and where applicable global) events, such as market- and political developments, macro-economic factors and healthcare risks such as Covid-19, amongst others. Your fund value may therefore go up or down and the investment capital or return on your investment is not guaranteed. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.oldmutualinvest.com or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except for our money market funds, where the cut-off is at 12:30.
- The valuation time is set at 15:00 each working day for all our funds, excluding our money market funds which is at 13:00, to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Multi-Managed Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- Excessive daily withdrawals from the fund may place the fund under liquidity pressures. In such circumstances a process of ring-fencing of withdrawal instructions and/or managed payouts over time may be followed.
- This fund holds assets in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 31 July 2026. Source: Morningstar.

Old Mutual Customised Solutions (Pty) Ltd is a Licensed Financial Services Provider.

Old Mutual Unit Trust Managers (RF) (Pty) Ltd, registration number 1965 008 47107, is a registered manager in terms of the Collective Investment Schemes Control Act 45 of 2002.
